Turnkey Test Systems & Services

Dodson Technical Services is your one-stop Engineering and Manufacturing firm. Here at Dodson Technical, we offer the test industry a wide variety of support, services and products. Our experience allows us the ability to support our customers in any situation that may present itself. With over 20 years of experience with shakers, amplifiers, acoustics, fixturing, and test support equipment, Dodson Technical Services can provide the expertise required to assist our customers in all aspects of their testing requirements. Dodson Technical Services has the capacity to produce complete test systems for our customers, shakers, amplifiers, isolation bases, tables, and fixturing. We also offer calibration services and certification with NIST traceability for vibration test systems, accelerometers, vibration controllers and more.

Since the start of Dodson Technical Services, Inc. our mission has been to be responsive and committed to our customers. We are dedicated to providing quality service and support for all of our customer's test equipment needs. We believe this is the best way to accomplish our goal of satisfying our customers. Our commitment is to produce quality parts and services the first time and every time thereafter.
